It is generally maintained among archeological authorities that a trade route extended from Olbia across the country to the Northern sea, and when a find of ancient Greek coins was made, it was contended to be substantial proof of the fact. Recently, however, it was proved that these coins were spurious. Olbia was destroyed by the Getæ about 70 to 60 B. C., but it revived, and when it was visited by Dion Chrysostom ill. about 100 A.
